About Us

http://www.prodin.co.za/about_us.asp

OUR HISTORY

Prodin™ was first established in 1965 and from humble beginnings has grown to a well-established company which boasts an impressive Project Profile and Track Record, having provided manufactured equipment to a variety of Clients both locally and internationally.

Prodin™ moved to its new facility over six years ago, originally operating from a 4,000m² workshop, to what is now one of the larger facilities of its kind within the industry sectors that we operate.

Our Current Facility is in excess of 25,000m², under cover and is continually expanded and upgraded to provide our existing and future clients with a state of the art manufacturing facility providing a broad range of services.

Prodin™ is a privately owned company and alongside many key management personnel and skilled resources, who have been with the Prodin™ Team from the beginning, the company continues to grow from strength to strength.

Prodin™ is an owner-managed company and together with our team we hope to be providing a service to industry for many, many years to come...
