http://www.prodin.co.za/mining_industry.asp

South Africa's mining sector is in a constant state of evolution which requires equally that new and ever more cost-effective mining equipment is developed.

Having delivered equipment to meet these challenging requirements time and again over its illustrious past, Prodin™ has become a preferred manufacturer for a number of specialized mining equipment suppliers to industry.

Our large, well-equipped production facilities and 56,000m² property provide the perfect location for mining equipment to be fully manufactured, assembled, trial erected and tested (including services) prior to being dispatched to the mines. This approach facilitates considerable cost savings through enabling all the necessary alterations and enhancements to be made onsite before equipment or structures leave our works.

Prodin™'s mining sector components experience includes:

- Hoppers
- Mills
- Kilns & Convertors
- Mineral Processing Plant
- Conveyor Systems
- Chutes
- Silos
- Dragline Components
- Material Handling Components
- Smelting & Roasting Components
- Screening Equipment
- Continuous Miner for coal mining
- Heavy steel structures
- Heavy Ducting
