http://www.prodin.co.za/power_industry.asp

Prodin™ has recently been awarded contracts for the construction of two of the largest coal fired power stations worldwide. This has enabled Prodin™ to firmly establish itself within the Power sector utilising skills and techniques already well-honed as a generalist and furnace component manufacturer.

Prodin™'s experience within the Power sector extends across a wide range of applications including:

- Regenerative Air Heaters
- Mill Gear Box Frames
- Large Pressure Vessels
- Rotors and Casings
- Coal handling equipment
- Coal milling equipment
- Bag filters / precipitators
- Scrubbers
- Piping Systems
- Heavy steel structures
- Ducting Systems
- Deorator
- Feed Water Tanks
